

Change your IT support strategy and simplify your business with the cloud!

Smart Host Business Cloud Computing

Simplicity. Security. Savings.

Omega Systems' Smart Host private cloud solution is a fully-equipped, maintenance-free alternative to the traditional in-house IT environment so you no longer need to make large investments in rapidly depreciating hardware. Omega Systems' private cloud solution reduces your financial liability by eliminating large capital purchases and unpredictable maintenance costs to a manageable, fixed-cost solution.

Adopting a grow-as-you-go platform, based on IaaS (Information as a Service), Smart Host is scaled to fit the pace of your business. A project manager is with you from beginning to end as we virtualize your environment within the framework of the Cloud. Be assured that you have made a wise move and will stay current with best-in-class hardware and software capabilities, as well as business continuity and multiple levels of security, all above the industry standard. Smart Host is the winning move, keeping your IT infrastructure, functionality and accessibility ahead of the competition.

At Omega Systems, we specialize in professionally maintaining our Data Center and hardware to reduce costs and increase capabilities for Smart Host customers.

We maintain yearly SSAE 16 AT 101 SOC 2 certification, ensuring your data is properly handled in a professionally controlled and regulated environment.
